

"Awesome! A positive event for all exhibitors," is how FPE Managing Director Ms Tania Carey described Foodpro. Strong interest in the DC Norris cooker kept Brian Carey busy.

The unique Thompson 5000 Mixer-Mincer generated strong interest at the Thompson Meat Machinery stand. Made in Brisbane and affordably priced at less than \$65K, the 5000 can process 125kg/min. Options include CO₂ injection cooling system and product discharge capabilities without going through mincing head.

The latest from Poly-clip System was prominent among the packaging materials and equipment on the Globus stand. The new Poly-clip FCA 160 incorporates new technology that makes it self-adjusting, self-lubricating, failsafe and user friendly in all working environments.

The Ball Control 235 created a lot of interest on the VMAG stand. This versatile machine can be linked to a small filler and can make up to 250 meatballs per minute, ranging in weight from 1 to 120gm and 10 to 60mm in diameter. It can also make torpedo, ellipses and drop shapes and changeovers take less than five minutes.
